

Insulant gauge

For exactly and economic cutting of insulating material

Millimeter scale on the length

Stabile cutting edge

Moving without new adjustment

Insulant gauge
Art.-No. D200 €98,00

The insulant gauge is adjustable in length and width. On the length is a millimetre scale to adjust the material on the right size. During the cutting the material is held from three sides and can be load by body weight. By this a cut in the right angle and correct form is no problem. In the next step you just put the instrument on the position where you want to cut and it will fit. The insulant gauge is completely made of aluminium, that make it robust, easy to handle, and easy to transport.

"I got the opportunity to work with the insulant gauges, and I must say, that this instrument is perfect. The cutting of the insulating material, here it was 180s, simple, perfect and really fast."

Hans Peter Esser, Mönchengladbach, by email from 11.10.04

Protractor

Made of stainless steel with scale from 0° bis 165°

With a length of 69 cm and a weight of 3 kg this protractor really has an extremely robust finish. The measuring range reaches from 0° up to 165° with scale graduations of 0.5°. This also enables the easy readability of 1/2°, for the distance between the grading lines is nearly 1 mm. The measuring blade can be tightened by means of the large clamping lever.

Big clamping lever

Second unfoldable nose

Art.-No. T600 €139,00

Very robust and large graduation from 0° to 165°

Compass

Precision compass forged of steel with hardened top.

Also with pencil holder available.

With pencil holder
Length Art.-No. Euro
300 mm B603 19,00
500 mm B605 36,00

Without pencil holder
Length Art.-No. Euro
300 mm B613 18,00
500 mm B615 28,00

Pro-divider

Extendable up to 2.5 m Radius.

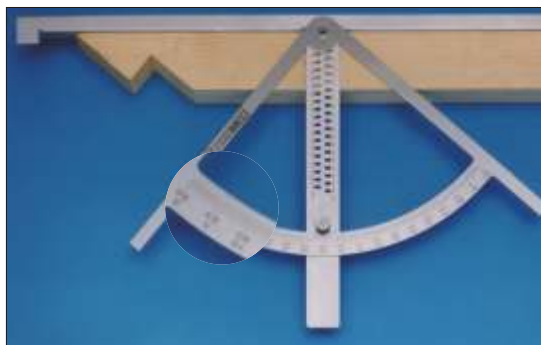

Made of anodized aluminium and extendable to 2,5 m for various inserts as pencils, carpenter's pencils, scriber, cutters, markers and felt pens.

Article Art.-No. Euro
Pro-divider 50 cm B205 36,00
Extension 1 m B206 10,00

Double alpha

With big centric protractor

80 cm long guide plate and double graduation scale

The special thing about this marking tool is the centric protractor and the long guide plate (800 mm). The graduated arc is etched with two contrary scales with 1/2° graduation intervals. The instrument is com-

pletely made of stainless steel. It is available with or without scribing perforations. The perfect scribing tool for every workshop.

Double alpha
Art.-No. M710 €69,80

Scribing of a "wrong mitre":

Mark the wideness of the narrow side on the wide side.

Put the instrument on the wide length and adjust the angle by the mark. Draw the angle on the material.

With the same adjustments you can draw the angle on the opposite, on the narrow length.
