

## Self levelling line laser Horizontal/vertical

For levelling inside and outside

- Self levelling to 5°
- horizontal + vertical
- Detector mode
- Activity radius 50 m
- Inside + outside
- Tilt-Mode
- Thread 1/4" + 5/8"
- Rubber grip
- Rotation adapter

Line laser M-1  
Art.-No. L232 €249,00

Detector  
Art.-No. L240 €118,00

M-1 Set inclusive  
Line laser M-1,  
Detector and elevator  
tripod 1083  
Art.-No. L233 €389,00

The M-1 is invented for workers, who wants to have a self levelling laser, which is useable inside AND outside. But it is much cheaper than a fully self levelling rotation laser. The M-1 fulfill most requirements and it is compatible to all tri-

pods. This makes the M-1 to a great solution for working inside and outside.

The detector (optional) for working outside and in bright rooms.

A compact body with rubber grip.

### Specification

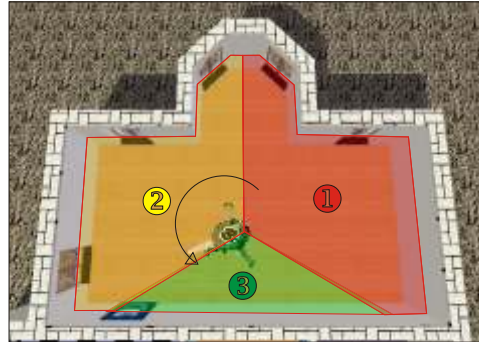

Self levelling area	± 6°
Working radius without detector	± 10 m
Working radius with detector	± 50 m
Laser class	2M
Laserdiode	2 x 635 nm, 1 mW
Accuracy	3 mm / 10 m
Wideness of the laser line at 5 m	< 1,5 mm
Tilt-Mode	yes
Working temperature	-5°C bis 50°C
Battery	3 x AA
Working hours	30
Tripod threads	5/8" und 1/4"
Compatible to tripod typ	A, B, C, D, E, F
Levelling system	magnetic dumper
Manual rotation	yes, with rotation adapter
Accessories	Battery, bag, rotation adapter

Elevator tripod 1083 with a shifting area from 61 to 173 cm (See page 9)

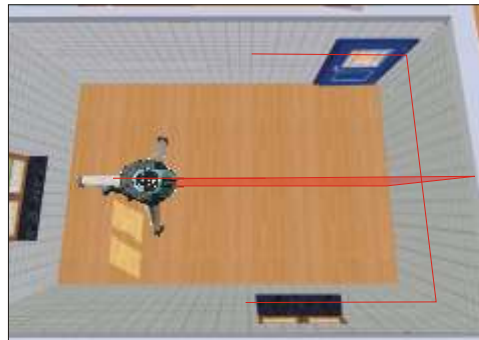

With the detector it is also possible to work outside.

By the rotation adapter it is possible to work in angled room, because you can turn the line in each direction.

When you set up the laser in a corner of the room, nearly the whole room is covered by the laser line. For this job you can use a monopod or a wall tripod.

The horizontal and vertical line can be project single or together.

With the Tilt-mode (self levelling off) you are able to make slope lines. Additional you can use a tripod with a tilt head (typ E).

## Monopod

Up to 336 cm .

Typ D

The monopod can be put tripod between floor and ceiling.

For laser with 1/4" or 5/8" thread. The lowest length is 79 cm, and the highest length is 336 cm. The plat form is infinitely variable between 22 cm and 332 cm. A bag is also included.

Art.-No. 1052 €43,00

## Tripod

Typ E

1/4" thread, tilt head, and a working radius from 0,57 m to 1,61 m.

Art.-No. 1045 €59,00

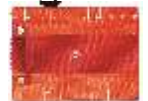

## Laser glasses

The shade of the glasses makes the beam more visible.

Art.-No. 1110 €6,50

## Target

Magnetic target for line- and rotation laser. A easy levelling is possible, because the target can be fixed to a metal bar or system ceiling.

Art.-No. 1200 €8,90
