

## Automatic builder's and engineer's levels

With high quality metall case and calibration certificate.

2.0 kg levelling instrument with metal case !

A high quality levelling instrument with metal case and magnification of 32 times. Big lens with 40mm in diameter. With compensator check key and high quality aiming system. A plumbline, a certificate, and a strong case are included. The best tripod for this instrument is **Tripod typ A.**

Art.-No.	N110
Magnification	32x
Scale of circle	400 gon
Shortest distance	0,8 m
Accuracy fo r	
1km double levelling	± 1,0 mm
Lens diameter	40 mm
Compensator working area	±15'
Accuracy compensation	±0,3"
Accuracy spirit level	8'/2mm
Thread	5/8"
Weight	2,0 kg
Price €	279,00

Make claims

High quality instrument in metal case and a magnification of 20x or 24x .

This instruments have a optical target collimator for quick alignment to target. Delivered with plumbline, certificate, and robust case. Suitable tripod is typ A.

## Telescope rod

For measure of high of a room or for levelling.

Spirit level only for S505

The telescope stick is made of a high quality aluminium. With the different printings on the front and backside it is possible to use the stick for optical levelling (E scale) and for rotation lasers (millimetre scale). But you also can measure highness and wideness of a room. By the locking system you have a safe locking of the single parts. With the 5m stick you get a separate box level and own case.

Length Pushed together	Length pulled out	Art.-No.	Euro
1,19 m	4,00 m	S504	39,00
1,22 m	5,00 m	S505	49,00

The 5m stick comes together with the box level and the case.

## Leica NA700er series

A high class levelling instrument from Leica Geosystems

Useful Tripod Typ A

Swap able between Gon and degree scale.

N728 and N730 have a coarse/fine aiming system.
