

Wooden leveling tripod 150 cm

Suitable for construction and surveyor's levels as well as for rotating lasers

Thanks to the flat tripod base, the heavy-duty leveling tripod is suitable for construction and surveyor's levels as well as rotating lasers. The processed wood gives the tripod a high level of robustness and weather resistance. In addition, the solid wood dampens vibrations and thus ensures that rotating lasers run smoothly.

With transport lock and shoulder strap

Stable positioning even in rough terrain thanks to the entry aid

With quick clamp

Features

- With quick clamp
- Passage for an optical plumb beam
- Stable positioning even in rough terrain thanks to the entry aid
