

Elevator tripod 173 cm

Ideal elevator tripod for line lasers and lightweight rotating lasers for interior work.

The height-adjustable elevator tripod with quick clamp and spreader stop offers a secure stand. Compact and easy to transport, it is ideal for sensitive floors and lightweight line or rotating lasers.

Due to the minimum working height of 61 cm, the elevator tripod is well suited for meter cracks. The maximum height of 173 cm allows laser lines to be projected onto the wall as a reference height for many tiling or painting jobs.

Cross braces for stabilization

With crank stroke.

With quick clamp

Features

- With quick clamp
- Passage for an optical plumb beam
- With spread stop
- Cross braces for stabilization
- With crank stroke.
- Can also be used on sensitive floors, such as parquet or tiles, thanks to the rubberised combination feet
