

Elevator tripod 286 cm

With fast and precise height adjustment thanks to crank stroke

The tripod has a large adjustment range and can be adjusted quickly and precisely thanks to the crank stroke. Due to its weight, it can support both line and rotating lasers. The integrated expansion stop and the cross struts ensure high stability. The central tube also has a hole for the plumb points of laser levels.

Passage for an optical plumb beam

Can also be used on sensitive floors, such as parquet or tiles, thanks to the rubberised combination feet

With crank stroke.
