

flexi rod

Ideal construction site levelling rod for use with rotating lasers

Quickly and accurately determine height differences with the correct sign. The anodized aluminium measuring stick is particularly robust and weather-resistant and is suitable for both indoor and outdoor use. It has a slide for holding laser receivers and thus enables convenient, stepless positioning along the scale. The circular bubble at the bottom of the measuring stick helps with alignment.

Robust construction made of anodised aluminium

With carriage for mounting a laser receiver

Adjustable zero mark thanks to extendable foot

Features

- Robust construction made of anodised aluminium
- Adjustable zero mark thanks to extendable foot
- With carriage for mounting a laser receiver
