

Wall mount for rotating laser

Wall/vertical mount for rotating lasers and line lasers

Thanks to the 5/8 thread, the wall mount is suitable for rotating lasers and line lasers and is infinitely height-adjustable at the touch of a button. The laser beam is positioned with millimeter precision using an adjusting screw. Thanks to the flat design of the rear, it can be combined with all standard construction tripods, regardless of whether the tripod plate is small or large. The holder can also be used as a floor stand on level surfaces.

Infinitely height adjustable

Can be used as a wall mount and vertical mount

Features

- **Infinitely height adjustable**
- **Can be used as a wall mount and vertical mount**
- **Fine drive for vibration-free alignment**

Specifications

Warranty / Months	24
