

Straightedge 3 m / 1 m

Particularly stable due to special alloy and reinforced end caps

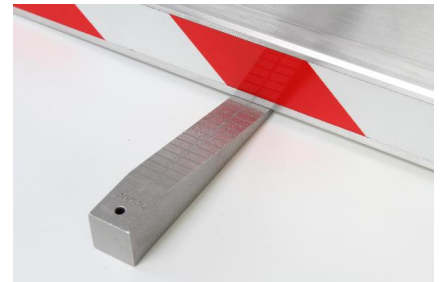

The 3 m long straightedge can be folded to 1 m, making it stronger than continuous material and easier to transport. A hardening special alloy and reinforced sides ensure high stability, while the end caps additionally protect the straightedge from impact damage.

Made of aluminium

Increased strength through folding mechanism

Warp-free and abrasion-resistant

Features

- Very stable due to the hardening special alloy
- Impact protection through reinforced end caps
