

Joiner's square 250 mm walnut with stainless steel blade 35 mm

Joiner's square made of fine walnut wood with calibration certificate

We use fine walnut wood for this high-quality joiner's square. Walnut is native to the whole of Europe and grows in warm locations. It is characterized by its lively grain and light to black-brown colouring. Walnut is a dimensionally stable wood that warps little and can be worked well.

The steel tongue is made of stainless steel and is marked with an abrasion-resistant millimeter scale. Brass rivets and a brass fitting give the angle a high-quality look.

Each angle is calibrated to an accuracy of at least 0.06°. You can obtain the calibration certificate by scanning the QR code on the bracket.

Double and double-sided millimetre scale on the steel sheet

Stability due to the 4-fold riveting

Features

- **Stainless steel tongue**
- **With brass fitting**
- **Double and double-sided millimetre scale on the steel sheet**
- **Stability due to the 4-fold riveting**
- **Meets the requirements of British Standard BS3322**
- **Walnut handle**

With brass fitting

Specifications

Dimensions	250 x 35 x 1,2 mm
Dimension handle	140 x 35 x 15 mm
Warranty / Months	24
Accuracy of the 90° angle	0,06°
