

Caliper 200 mm

Stainless steel caliper with dial gauge

The battery-independent caliper is very precise and easy to read thanks to the clear dial. The dial can also be rotated and therefore adjusted as required.

The caliper has a metal thumb roller, which makes it very easy to operate with just one hand. The measuring bar is made of stainless steel and is therefore very durable.

Measuring bar made of stainless steel

Remove external and internal dimensions quickly and accurately

Scaled measuring bar

Features

- Remove external and internal dimensions quickly and accurately
