

Hedue C036 moisture meter

For easy determination of the moisture content of wood, building materials and paper

The hedue C036 is a moisture meter that has both a non-destructive viewfinder mode and a needle mode. It enables the moisture measurement of wood or building materials in a matter of seconds. Time-consuming measurements, such as those using the drying cabinet method or the CM method, are no longer necessary. The measured values can be conveniently read off the display and frozen if required.

The most common woods and building materials are already stored in the device under fixed codes and can be preset directly with the help of the user manual in order to achieve the perfect measurement result for the respective material.

Direct display of humidity in %

Suitable for wood and building materials between 200 and 3000 kg/m³.

Determination of the moisture content of wood and building materials within seconds

Features

- Determination of the moisture content of wood and building materials within seconds
- Suitable for wood and building materials between 200 and 3000 kg/m³.
- The measurement is non-destructive
- Direct display of humidity in %
- The limit values for humidity values are freely programmable
- Measured values can be frozen via Hold key

Specifications

Measuring range wood	0 - 80 %
Measuring range building materials	0 - 50 %
Reading	0,1 %
Measurement depth Search mode	5,0 cm
Measuring depth needle mode	1,2 cm
Type of battery	AAA

Number of batteries	4
Operating temperature	0°C - 50°C
Weight	175 g
Warranty / Months	24
EAN	4012589670365

Scope of Delivery

- Suitcase
- Batteries Alkaline
- Insertion needles
- Operating instructions
