

Hedue EM3 laser distance meter

The smallest laser distance meter. Fits in every pocket!

***** Unfortunately sold out! A new EM3 with USB-C port and improved display will be available soon! It's worth the wait :-)** ***

Rechargeable via USB port.

The built-in Li-Ion battery can be recharged via the USB port. You will need a micro USB cable for this, as you probably already have one at home. That's why we supply the hedue EM3 laser distance meter without a cable and charger, so we don't burden the environment any more than necessary.

Just one button.

The simple operation with just one button is fun. This has enabled us to keep the laser distance meter so exceptionally small that it really does fit in any trouser pocket or handbag.

Always with you.

If we had made this laser distance meter even smaller, you wouldn't be able to find it in your pocket or handbag. As a key ring, the hedue EM3 laser distance meter will accompany you to all your professional appointments.

Distance measurement up to 40 m.

Clearly readable and illuminated display.

As a key ring, you always have the laser distance meter with you and to hand.

Features

- Distance measurement up to 40 m.
- Clearly readable and illuminated display.
- As a key ring, you always have the laser distance meter with you and to hand.
