

AL25 Paving Stone Gauge

hedue AL25 Measuring Template and Marking Template for Paving Stones, Curbstones, and Slabs – adjustable paving cutting template for transferring angles and lengths, installation aid for pavers, gardeners, and landscapers

Edge Fitting Stones: Measure Once, Cut Cleanly

The curbs aren't finished until the last fitting stones are in place—and those are what slow things down the most. With the hedue AL25 measuring template and marking template, you can measure the length and angle of the gap in a single step. Place the yardstick against the curb and the adjacent paving stone, secure the setting with two wing screws, and transfer the cutting line directly onto the stone. No need for a sliding bevel or ruler—and there are fewer cutting errors.

The gauge works with interlocking pavers, rectangular and corrugated stones, clinker bricks, and slabs up to 25 cm. It's built to be durable and is therefore designed for daily use on construction sites. For professionals in gardening and landscaping, it's an everyday tool; for DIYers, it's a great help when working on driveways or patios.

For standard paving stone, clinker, and slab sizes up to 25 cm

Features

- **Angle and Length in One Step**
The guide measures the curb geometry directly at the curb.
- **For standard paving stone, clinker, and slab sizes up to 25 cm**
- **Made of stainless steel and powder-coated steel.**

Specifications

Dimensions	400 x 161 x 82 mm
Weight	430 g
Warranty / Months	24
EAN	4012589702004
