

1-man water level

Electronic water level with 3-tone acoustics

With the electronic water level, it is possible to measure an entire floor on your own. The built-in 3-tone acoustic system emits a clear signal when the water level has reached the measuring mark. The other tones make it easy to determine whether the water level is too high or too low. Visual contact with the device is therefore not necessary. This makes it easy to transfer measuring points from room to room.

3-tone acoustics

Mit 20m Schlauch

Can be used alone

Features

- 3-tone acoustics
- Can be used alone
- Mit 20m Schlauch

Specifications

Measurement accuracy	1 mm / 20 m
Type of battery	9 V
Number of batteries	1
Warranty / Months	24
EAN	4012589774209

Scope of Delivery

- Batteries Alkaline
- Suitcase
- 20 m hose
- Operating instructions
