

Profile gauge PS1 2 x 20 cm

For scanning complex contours

The profile scanner enables complex contours to be scanned quickly. The 20 cm long elements can be easily plugged together and adapted to individual requirements. The individual elements can also be connected to each other at an angle using the angle bracket included in the scope of delivery. Due to the flat and even support of the template, the scanned profile line can be easily transferred to other workpieces.

Can also be connected together at an angle

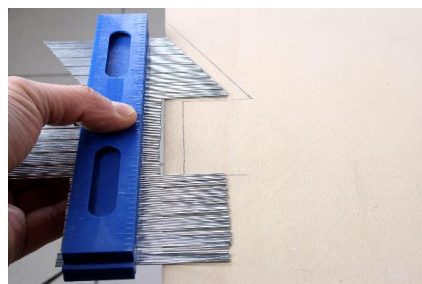

Elements are pluggable

Simple scanning of complex contours

Features

- Simple scanning of complex contours
- Elements are pluggable
