

Rotary laser hedue Q1 in bag

Self-leveling rotating laser with standard batteries and test certificate. For all horizontal leveling work.

QR code on the device.

The compact hedue Q1 construction laser is precise with a levelling accuracy of 1 mm at 10 m. You can rely on this, because we at hedue in Germany calibrate every rotating laser before delivery. You can retrieve the certificate via the QR code affixed to the device.

Operation with standard batteries!

The hedue Q1 rotating laser is powered by four AA batteries. The battery compartment is easy to open and the batteries are easy to remove. Also remove the batteries if you are not using the construction laser for a longer period of time to protect the valuable electronics from damage caused by leaking batteries.

Simple operation.

This rotating laser has radically simplified operation. There are only two buttons on the construction laser itself, namely on/off and anti-shake. This is perfectly adequate for most applications.

The **optional remote control** provides three additional functions:

1. The line function, here the rotating laser projects a short laser line. The laser line is more visible than the rotating laser beam, which can be useful for some interior work.
2. The pause button temporarily switches off the laser beam. However, level monitoring remains active.
3. Manual inclination for a laser line inclined up to 5°.

Horizontal self-levelling by servomotors up to 5° inclination.

Rotation laser in bag with batteries and laser detector with holder.

Easily accessible battery compartment and powered by standard batteries.

Features

- **Rainproof housing.**
- **Can be used on tripods and wall mounts with 5/8" thread.**
- **Tested accuracy with free certificate on the device. (QR Code readable with smartphone.)**
The devices are individually tested and delivered with a calibration certificate.
- **Working in bright light and at long distances in conjunction with laser detectors.**
- **Horizontal self-levelling by servomotors up to 5° inclination.**
- **Easily accessible battery compartment and powered by standard batteries.**
- **Rotation laser in bag with batteries and laser detector with holder.**

**Tested accuracy with free
certificate on the device. (QR
Code readable with smartphone.)**

Specifications

Working area with laser detector	500 m
Self-levelling range horizontal	5°
Levelling accuracy	1 mm / 10 m
Rotation speeds rpm	600
Laser class	II
Laser Diode	635 nm
Laserfarbe	rot
Opening angle of the line function	10°, 25°, 50°
IP protection class	IP54
Remote control reception range	20 m, 360°
Type of battery	AA
Number of batteries	4
Operating time in hours	10
Tripod thread	5/8"
Operating temperature	-10°C - +45°C
Weight	1,2 kg
Warranty / Months	24
EAN	4012589821439

Scope of Delivery

- Suitcase
- Test certificate
- [Laser detector hedue E2](#)
- Batteries
- QuickstArt
