

XXL goniometer

A robust and indestructible sliding bevel for measuring and scribing angles on large components.

A large and heavy sliding bevel, robust and hard-wearing. The degree arc is provided with a permanently etched degree scale. Thanks to the generous graduation distance, even half degrees are always easy to set and read. The large clamping lever allows the measuring arm to be locked in any position easily and effectively. A second support can be folded out if required, enabling a clean stop without great effort.

Made of stainless steel

Mit Gradskala von 0° bis 165°

legs can be fixed by a large clamping lever

Features

- Made of stainless steel
- legs can be fixed by a large clamping lever
- With fold-out nose for an additional supporting surface
- Mit Gradskala von 0° bis 165°

With fold-out nose for an additional supporting surface

Specifications

Dimensions	69 x 5 (14) x 0,9 cm
Scaling	0° - 165°
Pitch distance	0,5°
Warranty / Months	24
