

Frame tape measure hedue RB1 50 m

Durable steel measuring tape with high-quality frame

The aluminium sloping frame is made of anodized light metal and has a blue, impact-resistant plastic handle and a robust metal crank. The crank can be folded into three positions and serves as a winding stop when closed. The pull ring is made of stainless steel.

The millimeter graduations on the white painted steel tape measure are black. The meters are highlighted in red to prevent reading errors. The steel tape is protected against corrosion with a phosphate coating and white lacquer. The applied scaling is finally coated with a clear lacquer.

With inclined aluminium frame made of anodised light metal

Handle made of blue, impact-resistant plastic

Folding metal crank handle

Features

- White painted surface
- With inclined aluminium frame made of anodised light metal
- Handle made of blue, impact-resistant plastic
- Corrosion and abrasion resistant
- Folding metal crank handle

White painted surface

Corrosion and abrasion resistant

Specifications

Length	50 m
Cross section	13 x 0,4 mm
Pitch distance	1 mm
Warranty / Months	24
Accuracy class	II
Weight	1,1 kg
EAN	4012589883055
