

Carpenter's square hedue ZY 700 mm with mm scale type A and marking holes

Seamless carpenter's square made of hardened steel with bright yellow powder coating

The seamless carpenter's square is made of hardened steel. Thanks to the bright yellow powder coating, the mm scale on the long leg can be read without glare.

The carpenter's square is used in the production and finishing of timber joints. Components and attachments can be precisely aligned. The tool is also suitable for marking out and measuring.

Features

- Made of hardened steel
- Bright yellow powder coating
- Millimetre scale on both sides of the long leg
- With marking holes
